## TREE-MENDOUS MARYLAND -- FALL 2006 ORDER FORM

Shemin Nurseries will provide TREE-MENDOUS MARYLAND with high quality native trees and shrubs at reasonable prices for public land planting. Your pre-paid order may be picked up at Shemin Nurseries. For an additional charge, Shemin Nurseries will deliver your order directly to your planting site. (Minimum delivery 25 trees.) Arrange your individual delivery directly with Shemin Nurseries 301-421-1220. **ALL TREES MUST BE PICKED UP OR DELIVERED BY NOVEMBER 15, 2006.**

A one-time delivery at no additional charge will be made to one DNR site in Washington (Greenbrier SP), Queen Anne's (Tuckahoe State Park) or Southern Prince George's (Cedarville SF) counties, early in the planting season to assist your pickup. If you wish to be included in one of these outlying deliveries, please place your order before OCTOBER 6TH. For specific information, call 410-260-8517 (Toll Free 1-877-620-8367 extension 8517.)

**CHECKS should be made PAYABLE to: Shemin Nurseries**

**AND mailed with this order form to:**

**TREE-MENDOUS MARYLAND**  
DNR Forest Service  
580 Taylor Avenue E-1  
Annapolis MD 21401

**or charge your order on VISA, M/C, AMEX, and fax it to us at 410-260-8595 (See front ---->)**

After processing your order, a **Confirmation Card** with your Order # and species ordered will be sent to you. All plants must be picked up by November 15th. **NOTE:** Be sure to count your trees & shrubs at Shemin BEFORE you leave the grounds. Shortages discovered later will NOT be replaced.)

**Please bring your confirmation card with you to pick up your order.**

**This is NOT a program for planting on PRIVATE PROPERTY. All trees must be planted on public land such as parks, community open spaces / easements / rights-of-ways, government facilities, and school grounds.**

**TREE-MENDOUS MARYLAND**, a program of the Maryland Forest Service, remains one of our most popular programs aimed at helping citizens restore tree cover on public land and community open space in Maryland. To date, we have assisted more than 2,800 towns and communities, parks, and schools plant trees and shrubs to help improve the environmental, social, aesthetic, and economic values of their community.

Become a **Maryland PLANT Community (People Loving And Nurturing Trees.)** If you are a town, community, school, or other entity, large or small, that is actively involved in tree planting and care, your group can work with Urban Forestry personnel in your area to achieve official recognition for your accomplishments. The **Maryland PLANT Community Award**, sponsored by the Maryland Urban & Community Forest Committee, was created to reward the outstanding tree planting programs of Maryland's towns, neighborhoods, and communities. For more information about **PLANT**, visit [www.dnr.state.md.us/forests/programapps/plant.html](http://www.dnr.state.md.us/forests/programapps/plant.html) or call 410-260-8510.

**Consider the following species for your planting plan:**

**American elm – (Ulmus americana)** is a treasured ornamental and shade tree with a spreading, vase-like form. This easy to plant and care for, fast growing, disease tolerant tree is cultivated from seedlings of an American elm with a proven track record and a high survival rate. It is not a patented variety, but a true American elm (*Ulmus americana*) with an established scientific record of Dutch elm disease resistance and longevity. Prefers rich, moist soil but grows well under a variety of conditions. Tolerates standing water in spring and fall and has good soil salt tolerance. Excellent urban tree. Seeds, buds, and tender young twigs are used as foods by birds and mammals.

**American cranberry bush – (Viburnum trilobum)** is an attractive, fairly dense deciduous shrub with showy fall leaf color, extremely handsome white flowers in spring, followed by red berries in fall and winter. Easily grown in sun or semi-shade in most soils, but prefers well drained, moist soils and clay. Medium growth habit can reach 10-12' and 6'-8' wide. Excellent wildlife plant.

**White oak – (Quercus alba)** - is one of the most handsome and long-lived oaks and is Maryland's state tree. Medium growth habit. Performs best in full sun in deep, moist, well-drained, acid soils, to dry upland slopes. Can reach height of 50'-80' (100' in the wild). The largest known white oak in America was 32' in circumference and grew in the Wye Oak State Park in Talbot County here in Maryland. It was destroyed during a storm on June 6, 2002. <http://www.dnr.state.md.us/naturalresource/fall2002/wyeoak.html>
